REMARKS		

25X1X
25X1 1. Train composed of 30 four-axle flatcars, was parked in Sonneberg (N 51/J 40) on 14 July 1950, ready for use by the SCC. The train was empty. The cars had been repaired at the Gotha Railroad Repair Shop. Some days later the train was dispatched to Leipzig-Moeckern (N 52/E 21).*

25X1A Comment. These four-axle flatcars, which have a carrying capacity of over 30 tons, are well-suited for the shipment of tanks. The cars mentioned are probably the same as those reported repaired in the Gotha Railroad Repair Shop.

25X1
